WFH Bundle

AI Powered Remote Worker Protection

At Beyond Computer Solutions, we are committed to make cybersecurity accessible to all by enabling MSPs to deliver cybersecurity-as-a-service. COVID-19 (Coronavirus) is driving many organizations around the world to rapidly adopt a work-from-home policy.

Business Email Compromise (BEC) and ransomware are the top two threats that MSPs and SMBs are facing in today's cyber-landscape. To enable MSPs to rapidly respond to the changing landscape, Beyond Computer Solutions has designed a package specifically for companies with remote employees. Each product is backed by our 24/7/365 Security Operations Center and extensive technical and go-to-market support.

BEYOND COMPUTER SOLUTIONS ENDPOINT PROTECTION

Beyond Computer Solutions Endpoint Protection is an integrated threat prevention solution that utilizes our own streaming-data analytics platform. The product combines the power of AI to block malware infections with additional security controls that safeguard against script-based, fileless, memory, and external device-based attacks and is backed by our Security Operations Center.

BEYOND COMPUTER SOLUTIONS EMAIL PROTECTION

Beyond Computer Solutions Email Protection is a cloud-based email security product that blocks spam and phishing attacks. Our solution catches malicious emails by utilizing computer vision, AI and machine learning. Driven, curious, mobile, and growing smarter by the subject line, Beyond Computer Solutions Email Protection adds an important layer of protection to your inbox.

BEYOND COMPUTER SOLUTIONS OFFICE 365 SECURITY MONITORING

Beyond Computer Solutions Office 365 Monitoring is a managed security product that collects, aggregates, and normalizes log data from Office 365 tenants using Beyond Computer Solutions's analytics platform, SIEM, threat intelligence, and 24/7/365 Security Operations Center. Identify threat-like behavior in O365 like unauthorized access to cloud mailboxes, admin changes in the environment, impossible logins, mass file downloads, and brute force attacks.
